

IT Professional Track

Beyond Integration Manager - Integrating Systems

Speaker: Tim Lally, KTL
9:45 - 11:00pm

We will take a high level look at the advanced technologies existing around Microsoft Dynamics and how and when you should use them. Find out what user level tools available to you so that you can inquire into data from multiple applications without an IT professional. Learn how Business Intelligence can tie it all together.

Microsoft SharePoint 2007 - Beyond the Hype

Speaker: Brian Razzaque, VMT
12:35 - 2:05pm

Microsoft Office SharePoint Server 2007 (MOSS) and Windows SharePoint Services 3.0 (WSS) provide for browser-based collaboration and document management, including the ability to deploy web sites that access shared workspaces and documents, blogs, wikis, discussion forums, polls, lists, and much more. Get a high-level overview of the standard features of the two products, as well as insight into the differences between the two and how licensing is handled.

Virtualization and Microsoft Dynamics

Speaker: Tim Lally, KTL
Speaker: Mac McClelland, K2e
2:10 - 3:25pm

Now that the latest versions of many Microsoft Dynamics products are supported by Virtual PC Technologies;

- What should your strategy be for using Virtualization?
- When does it make sense to use this technology?
- What are the side effects and other considerations to know about before I use this technology?

Join us on this high level overview of this exciting new technology.

Microsoft for Accountants Track

Keynote: What to do before purchasing a new Accounting System

Speaker: Mac McClelland, K2e

8:30 – 9:30am

Choosing a new accounting software package is a complicated task. During this keynote Mac breaks down the preparation steps, defines the “buzz words” and lists the most important factors to consider when choosing a package. Come away from this session prepared to make an informed decision.

Excel Pivot Tables for Accountants

Speaker: Mac McClelland, K2e

9:45 – 11:00am

Back by popular demand! This session was such a huge success last year we asked Mac to come back and discuss PivotTables again. Mac will be addressing NEW material around PivotTables and how you can use them to improve your productivity.

PivotTables are the most powerful feature of Excel, yet few accountants use them with guidance, and demonstration from your instructor, you will be ready to begin using PivotTables to accomplish routine analysis and reporting. This session will begin with basic PivotTables and progress to advanced PivotTable topics.

Office 2007 for Accountants

Speaker: Mac McClelland, K2e

12:30 – 1:55pm

Microsoft Office 2007 is the most radical and evolutionary release since Office 95. We cover features important to accountants and prepare them to develop a migration strategy for their organization as quickly as possible.

Office 2007 dramatically changes how you will perform everyday functions such as word processing, sending and receiving e-mail messages, working with databases, and creating spreadsheets. New features such as the Ribbon interface, improved graphics capabilities, and XML-based data files offer tremendous opportunities for increased productivity, but only for those prepared to take advantage of them.

Business Intelligence (BI): What is it and how will it change what I do?

Speaker: Ed Mullin, President, Hartman Business Systems

2:10 – 3:20pm

How can you use existing data to increase revenue, decrease expenses, mitigate risk, and decrease cost of service? Attend this overview session on Business Intelligence and learn how it can provide the right information to the right people at the right time.

Current Dynamics GP/SL User Track

Keynote: An Update on Microsoft

Speaker: Microsoft
8:30 – 9:30am

If you want to know where exactly Microsoft is taking Dynamics GP, in this session you'll get a concise synopsis of what's new from the Microsoft Dynamics Team. You'll come away with a preview of Dynamics GP 11 (including the new Financial Reporting tools and GP10 extensions), a translation of Microsoft "jargon," and a true understanding of what to expect from Microsoft Dynamics in the future. Microsoft will introduce current promotions as well.

FRx – What can it do for my business?

Speaker –Firas Hamoui, Intellitec
9:45 – 11:00

Microsoft FRx brings insight and control to the entire report creation, generation, and distribution process. It allows you to create the kind of financial reports your organization requires, with the detail and flexibility you need. In this session you will see FRx in action. You will walk away from the demo empowered to do the following:

- Automatically pull general ledger information into your reports
- Link financial data from your general ledger and a spreadsheet
- Create virtual roll-up structures for reporting at different levels—for example, by unit, city, state, territory, or country.
- Report on individual or groups of accounts.
- Easily identify missing or duplicate accounts.
- Compare revenue and expense figures for different departments by creating side-by-side reports.
- Create calculations such as expenses divided by units produced
- Organize both financial and nonfinancial-related information together in one cohesive report.

50 tips in 50 Minutes and CustomerSource 101

Speaker: Colleen Williams, KTL
Speaker: Jonathan Gray, KTL
12:30 – 1:55pm

Participate in this fast-paced session as we feature 50 tips and tricks that will help increase your usability of Microsoft Dynamics GP or SL. (Two concurrent sessions will take place. *In addition...*
