

## KTL SOLUTIONS PRODUCTS

KTL Solutions' team of software developers have built numerous software solutions ranging from single field changes to the most complex calculations for Great Plains Customers, Dynamics CRM users, and standalone business needs. Listed below are the current solutions available for resale. (No CDs sent; either download or chunk files.)

All products require a 20% enhancement (ENH) of a product list price, with the exception of Crystal Converter.

### **KTL SOP/POP Advanced Distribution (4324)**

**\$1995 + ENH**

KTL SOP Advanced Distribution adds more flexibility to the account structure of the GP sales order processing system. Currently, sales order processing allows you to default the posting account from the item card, customer card, or default posting account. This modification expands on that and allows the user to default the segment of the account from the item card, customer card, location, posting setup, or a static value. Just as with the SOP, POP allows you to default each segment of the account from the item card, vendor card, location, posting, and static value. The KTL SOP/POP Advanced Distribution works with both the Business Essentials and Advanced Management products. The product supports the Standard and Professional versions of Dynamics GP 2010; Perpetual Licensing for GP 2013, GP 2015, GP 2016.

### **PayStubViewer (KTLPSO)**

**\$3000 + ENH**

The PayStub Viewer product is a web-based application that provides Dynamics GP employees online access to their pay stubs. As new checks are posted within Dynamics GP, the employees can be notified through email so they are immediately aware that their pay stub is available online. The included configuration tool allows administrators to control employees' access to the website, hide/show specific data elements in the pay stub, and enable employee supervisors to view and print their employees' pay stubs. PayStub Viewer supports the Standard and Professional versions of Dynamics GP 2010; Perpetual Licensing for GP 2013 and GP 2015.

### **Jobs Manager**

**\$795 + ENH**

Jobs Manager for the SQL Server is a standalone, web-based tool that allows the end users to easily maintain SQL jobs without having to go through the SQL Tools or necessarily have understanding on SQL Server. The application allows for disabling, enabling and running jobs. It utilizes Windows authentication and is hosted under IIS.

### **KTL FastAP (4313)**

**\$1000 + ENH**

KTL FastAP streamlines the Accounts Payable data entry process. It cuts your data entry time by combining two tasks, thereby allowing the Great Plains User to enter and verify the Account Distributions on the main window. The KTL FastAP works with both the Business Essentials and Advanced Management products. The product supports the Standard and Professional versions of Dynamics GP 2010; Perpetual Licensing for GP 2013, GP 2015, GP 2016.

### **Crystal Converter (KTLCC)**

**\$995**

Crystal Converter is a windows application developed by KTL Solutions that helps users of Crystal Reports convert their reports to Microsoft SQL Reporting Services. It includes improved support for SQL stored, procedure-based reports. The application is completely user driven and can convert most reports in seconds. There is no enhancement fee for this product.

## KTL SOLUTIONS PRODUCTS

### **KTL PR Security (4321)**

**\$1995 + ENH**

The KTL PR Security provides the same security functions for Payroll windows and reports as the Human Resource module. KTL PR Security works with both the Business Essentials and Advanced Management products. This product is also available without owning Human Resources. The KTL PR Security product supports the Standard and Professional versions of Dynamics GP 2010; Perpetual Licensing for GP 2013, GP 2015, GP 2016.

### **KTL SafePay**

**\$995 + ENH**

The KTL SafePay application has been designed to help automate the process of creating, encrypting, and uploading positive (KTL SafePay) files to a bank outside of Dynamics GP. This process also includes your organization sending out confirmation emails. One of the many advantages of an auto SafePay is that checks from multiple GP companies can be included in a single SafePay file, which, depending on the bank, can greatly reduce costs during your upload.

### **KTL Scheduler**

**\$795 + ENH**

The KTL Scheduler is an application that facilitates management of multiple tasks, each with its own processing schedule. It is designed such that it supports the addition of future integration tasks without requiring code changes to the service. The tasks are created in plug-in assemblies (dll-s) and typically facilitate the integration / communication between two systems. This particular application is more for developer to developer. The KTL Scheduler can standalone as its own product or be integrated with Dynamics GP.

### **Multicloser**

**\$395 + ENH**

Multicloser is a CRM plugin that allows users the ability to close multiple quotes at once from the opportunity window. This is beneficial especially in the case when there are many quotes associated to one opportunity since otherwise, the users would have to close them one by one. MultiCloser supports the following versions of CRM: CRM 2013, CRM 2013 SP 1, and CRM 2015.

### **FlexQualifier**

**\$395 + ENH**

FlexQualifier is a CRM plugin that allows for a more flexible process when qualifying leads. The users can easily turn on and off the plugin, as well as choose their settings and actions when it comes to creating entities for contact, account, or opportunity. They can choose either to auto-create or make the decision at the time of qualifying on whether a certain entity will be created or not. FlexQualifier supports the following versions of CRM: CRM 2013, CRM 2013 SP 1, and CRM 2015.

### **SQAI**

**\$1995 + ENH**

SQAI, pronounced like "sky", stands for System Queue Application Integration. KTL designed this product to be a mediator of communication between a particular source of your choosing and a particular destination of your choosing. In other words, two systems that don't know anything about one another can connect intermittently. SQAI is a developer to developer tool and was a custom developed KTL product. This is a standalone product.

## KTL ENHANCEMENT PLAN INFO

What does the Enhancement (ENH) Plan mean? How can you benefit from it? And, why is it important to stay up-to-date with your plan? Learn about **KTL Product Enhancement Plan** benefits.

### WHAT THE KTL ENHANCEMENT (ENH) PLAN MEANS

Customers must be current with their KTL ENH Plan in order to benefit from this cost savings. The ENH Plan fees provide End Users with the following benefits:

- Product Upgrades
- Product Fixes
- Product Enhancements
- Unlimited Product Support

\* Support Incidents are restricted to supporting KTL products only.

### HOW YOU BENEFIT FROM THIS

Upon initial purchase, the customer is required to pay the first year's Enhancement fee of 20% of the product's list price.

Keeping the enhancement current will assure that your End Users will be functioning with the most up-to-date features of our software. The enhancement renewal for each year hence forth is 20% of the current list price of the software.

### WHY IT'S IMPORTANT TO STAY UP-TO-DATE WITH YOUR PLAN

KTL product support includes assistance through our client support portal with problems related to the KTL products. If you are not up-to-date with your enhancement fees, it may be possible that KTL Solutions' consultants may not be able to resolve your issues.

Support may include questions about installation, functionality, features, operation, and proper use. Assistance with errors that arise during the use and operation of a KTL product are also covered by our support plan, as long as those errors are directly related to the use or operation of the KTL product. Support does not include assistance with problems arising from networking or system issues not related to the KTL product including, but not limited to, problems with system resources, system limitations, data corruption, or other errors unrelated to the KTL product. Nor does it include changes or modifications to the KTL product or any direct manipulation of customer data or files.

*Our unlimited support offer is valid only to those who are current with their KTL Enhancement Plan fees. Those who are not current, please contact Kimberly Lally at [klally@ktlsolutions.com](mailto:klally@ktlsolutions.com) to find out how you can get back on track.*
